ORCID: [to be completed]

Article type: Original methodological development with application.

Word count (main text, excl. abstract/references): approx. 5400 (approx. 9600 counting 8 figures and 13 tables at 200 words each; the journal target is ~8000 words—see cover letter).

Figures: 8; **Tables:** 14.

Acknowledgments

The authors thank the clinical and laboratory staff of the participating haematology centre for maintaining the molecular-monitoring records used in this study. No third-party writing or editing assistance was used.

Statements and Declarations

Ethical considerations

The study used de-identified, retrospectively collected molecular monitoring data. The study was approved by [name of Institutional Review Board / Ethics Committee], [institution], approval number [XXX]; or the requirement for approval was waived by the same committee for retrospective, de-identified data. [Complete before submission.]

Consent to participate

The requirement for informed consent to participate was [written / verbal / waived] by the approving committee for retrospective, de-identified data. [Complete before submission.]

Consent for publication

Not applicable; the manuscript reports de-identified aggregate analyses and contains no individually identifying data.

Declaration of conflicting interests

The authors declared no potential conflicts of interest with respect to the research, authorship, and/or publication of this article.

Funding

The authors received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors. [Confirm or amend before submission.]

Data availability

Direct identifiers are excluded from all analysis files and retained only in a private linkage file; processed data and analysis code supporting the findings are available from the corresponding author on reasonable request, subject to institutional and ethical approval.

Reporting guidelines

Development and reporting of the prediction model followed the TRIPOD recommendations; the completed checklist is provided as a supplementary file.

Use of AI

[Disclose any use of generative-AI tools here per SAGE policy, or state “Not applicable”. Complete before submission.]
